

# Series on Exploring Combinatorics and Number Theory

November 17-18, 2018

## Plenary speakers:

**Ron Gould and Michael Mossinghoff**

There is currently not an annual meeting in the area for Combinatorics or Number Theory, despite there being a large number of researchers in these areas locally. The faculty at Cedar Crest College is looking to change that. So, come one, come all to the first annual SECANT conference. Please feel free to share this page with friends and colleagues.

The more the merrier!

At this current time, there is no external support for this conference.

For more information and registration information,  
please visit the SECANT website at:

<https://tinyurl.com/SECANT-Conference>

*Hope to see you in Allentown in November!*
